MAAC Safety Code

Constant review is required to maintain current MAAC Safety Code documents on the Diamond Aces RC Flying Club website. We have therefore decided to simply provide a link to the documents on the MAAC website.

Basic RC Flying mainly involves two documents MSD 03 and MSD 06. If your interests extend beyond basic RC Flying you will need to familiarize yourself with additional activity specific documents. MSD 02 will help you determine other applicable documents.

Click on the following link then on "Committee (Standing) - Safety".
